Evaluating Five University-Level EAP Courses through the Lens of Practice Architectures

Saturday 21 September 2024 11:10 (1 hour)

The research presented in the poster aimed to evaluate five university-level EAP courses in an Indonesia institution, focusing on what cultural-discursive, material-economic, and social-political arrangements constraining and/or enabling the successful practices of EAP teaching and learning in the institution, using the framework of Practice Architectures (Kemmis, 2019), through thematic analyses on the data in the form of documents and interview transcripts with five lecturers of the courses.
